

# Tackmaster-PC

The Tackmaster-PC is a durable instrument designed to provide highly accurate results of ink tack. This extremely simple instrument requires minimal maintenance and will provide identical results to other tack measuring instruments. All functions of this instrument are instructed through a standard USB port to and from a standard P.C. (P.C. sold as an option).

## Typical Printout

The software included with this tester allows the operator to build "projects" for specific tests and print single or multiple tests. The data files can be stored for future use or exported to other computer applications.

Width	24"
Depth	18"
Height	18"
Weight	135 pounds

Available January 2006
