

Saddle Dryer, Model SD-500

Overview:

The model SD-500 Saddle Dryer is a laboratory tester used to determine the drying characteristics of heat-set inks.

Operation:

The operator sets the unit to the desired temperature. After the unit reaches temperature, the operator simply places a printed sample on the saddle for a specified time period to verify that the ink meets the drying time requirements.

Specifications:

Size: 8.0 inches High x 7.0 inches Wide x 8.0 inches Long
Temperature Range: Ambient - 450°F
